ABSTRACT

The cosmos is made up of universes in infinite number, having similar structure and properties, embedded one in each other and extended in ascending and descending order.

To explain and justify this model, there are three universes so far known to us (a) Geo-Universe (b) Atomic-Universe (c) Energy-Universe. These three are having similar structure and properties, embedded one in each other and extended in ascending and descending order. Of these three, we known some extent about the internal structure and properties of the Geo-Universe but we do not known its external structure. We know some extent about the external structure and properties of the Energy-Universe but we do not know its internal structure. Between of these three universes, we came to know a large extent about the internal & external structure and properties of the Atomic-Universe. Hence, I have taken the similarities of internal structure & properties between the Geo-Universe & Atomic-Universe to propose that all the universes in ascending and descending order of the creation are having similar internal structure and properties. The similarities of external structure & properties between the Atomic Universe and Energy-Universe are taken to propose that all the universe in ascending and descending order of creation are having similar external structure and properties. And the manner in which of these three universes i.e., embedded one in each other, extended in ascending and descending order to propose that all the universes in ascending and descending order of the creation are embedded one in each other and extended in ascending and descending order.

KEYWORDS: Ascending ordr of creation , descending order of creation.

INTRODUCTION

SIMILAR EXTERNAL STRUCTURE & PROPERTIES

According to the model, all the universes in ascending and descending order of the creation are having similar external structure and properties. To justify this, I have taken many similarities between the atom and photon. For example:-

Table 1

Atomic-Universe	Energy-Universe
1) The atom appearing in several forms such as Hydrogen to uranium etc., being due to the Internal structure having different atomic particles at various numbers.	1) The particle “Photon” related to energy appearing in several forms such as radio waves, gamma rays, violet rays etc being may be probably due to the internal structure having different particles at various numbers.
2) The atom exhibiting several physical and chemical Properties such as weight, colour, taste, hardness etc being due to the internal structure having different particles at various number.	2) The particle “photon” related to energy exhibiting properties such as wave length, colour, temperature etc being may be Probably due to the internal structure having different particles at various number.

SIMILAR INTERNAL STRUCTURE & PROPERTIES

According to the model, all the universes in ascending and descending order of the creation are having similar internal structure and properties. To explain and justify this, I have taken many similarities between the atomic-universe and Geo-Universe.

Table 2

Atomic-Universe	Geo-Universe
1) Various atomic particles at different sizes in several numbers are present in the atom.	1) Various astronomical objects at different sizes in several numbers are present in the Geo-Universe.
2) These atomic particles having three types of charges at negative, positive and neutral states are present in the atom.	2) These astronomical objects having three type of charges at positive, negative and neutral states are present in the Geo-Universe.
3) Positively charged protons are present in the nucleus.	3) Stars built by atoms having positive charged nucleus are present in centre of the Geo-Universe.
4) Neutrons at neutral state are present in the Nucleus.	4) Planets at neutral state are present in Centre of the Geo-Universe.
5) Negatively charged electrons are present at large distance of the atomic nucleus in the atom.	5) There is a concept that anti-matter cosmic bodies built by atoms having negatively charged nucleus are present at large distance of the Geo-Universe.
6) Additional neutrons called isotopes are present.	6) Additional planets called satellites around the planets are present.
7) Radiation emitting from the atom.	7) Cosmic rays emitting from the Geo-Universe.
8) There is a property of nuclear fission in the atom.	8) There is a property of super Nova is in the Geo-Universe.

DESCENDING ORDER OF CREATION

The Geo-Universe that means the Universe seen around our earth is having magnificent structure and properties such as galaxies, stars and planets and some planets such as earth having continents, countries, oceans, trees, animals. Cyclones, human beings etc. Such Geo-Universe being built by Universes of its descending order of creation that means atoms.

Atomic-Universe that means the atom present in several forms from hydrogen to uranium etc is another universe having magnificent structure and properties such as electrons, protons, neutrons, etc., and continents, countries, oceans, cyclones, trees, animals, human beings may be present on some neutrons having suitable conditions exactly similar to the earth planet resembling in the Geo-Universe. Such atomic Universe being built by universes of its descending order of creation that means energy particle ‘photons’.

The Energy-Universe that means the particle “photon” related to energy present in several forms of electromagnetic radiation is also another universe having magnificent structure and properties resembling to Geo-Universe

and atom. Such Energy-Universe may also being built by Universes of its descending order of creation that is not yet known to us.

Thus the descending order of creation continuous infinitely.

ASCENDING ORDER OF CREATION

The Energy-universe that means the particle related to energy “photon” having magnificent structure and properties is being as a primary syntactic unit in the universe of its ascending order of creation that means atom. All components in the atom are built by these “photons” in infinite number. Such each and every energy particle “photon” is basis to an infinite descending order of creation.

The Atomic—Universe that means the “Atom” having magnificent structure and properties is being as a primary syntactic unit in the universe of its ascending order of creation that means in our Geo-Universe. All components in the Geo-Universe such as stars, planets etc., are built by these atoms in infinite number. Such each and every atom is basis to an infinite descending order of creation.

The Geo-Universe that means the “Universe” seen around our earth having magnificent structure and properties is being as a primary syntactic unit in the universe of its ascending order of creation that is not yet known to us. All components in that Universe are built by these Geo-Universes in infinite number. Such each and every Geo-Universe in that ascending creation is basis to an infinite descending order of creation.

Thus the ascending order of creation continuous infinite.

COSMIC-ENVIRONMENTS

The fill of structure and characteristics in the universe of the cosmos proposed as **cosmic environments**. For example the fill of structure and characteristics like galaxies, stars, planets etc in the Geo-Universe proposed as **Geo-Environment**, the fill of structure and characteristics like proton, neutrons and electrons etc in the Atomic-Universe proposed as **Atomic-Environment** and the fill of structure and characteristics in the Energy-Universe that means in the photon that is not yet known proposed as **Energy-Environment**.

SPACE WEATHER

The fill of structure and characteristics like galaxies, Stars, Planets and their orbits and other physical forces etc that surrounds in the universe proposed as **space atmosphere**, the state of galaxies, stars, planets, nebulae. Pulsars etc at a particular region over a long period of time proposed as **space-climate**, the state of characteristics of space-climate like solar wind flares, asteroids etc at a particular region during a short period of time proposed as **space-weather**.

SPACE REGIONS The state of space atmosphere being in still proposed as “**Inactive Space Region**”, the state of space atmosphere being in active proposed as “**Active Space Region**” The region of space atmosphere in which the celestial bodies are more widespread areas proposed as “**Space High Pressure Area**”, the less widespread areas proposed as “**Space Low Pressure Area**”.

SPACE LOW PRESSURE SYSTEMS

Some space times, happens variation of differences of pressure in the space-climate, At such a juncture, the

CONCLUSIONS

We can make many more studies on this theory and find out many more mysteries of the universe.
